

Mequatling Angus

Proudly sponsored by:

“Why settle for less, when you can have the best!”

We would like to heartily welcome you to Mequatling for the 2016 Mequatling Angus bull and 6 year old female sale.

Angus cattle are our only business. At Mequatling we try our level best to produce cattle that excel in reproduction, milking and growth as well as carcass quality, all combined together in an eye-appealing package. We believe that performance data should back the cattle and not just opinions. In order to mean anything, pedigrees and performance data need to be backed by DNA parentage verification. Preoccupation with real-world genuine performance remains the primary focus at Mequatling.

As always, we are selling every pregnant 6 year old female – no exceptions! The cows are a gorgeous group of powerful broodcows and are tremendously functional - the average reproduction index for the cows on sale is a mind-blowing 121 index. (More importantly, the lowest reproduction index of any cow on sale is an outstanding 118 index). There are some very special donor prospects included in the offering.

The selection of bulls continues to provide excellent “Butt, Body and Balance”. All bulls have performed on South Africa’s largest growth test and carcass evaluation. The selection process has been strict and only the top 33% of bulls born in 2014 are on sale today.

Enjoy the day!

Philip & Vicky Barnard

“Why settle for less, when you can have the best!”

Dit is vir ons aangenaam om almal by Mequatling en by die 2016 Mequatling Angus bul en 6-jaar oud vroulike veiling te verwelkom.

By Mequatling probeer ons ons uiterste bes om beeste te produseer wat absoluut uitblink in reproduksie, melk en groei sowel as karkas kwaliteit, alles gekombineer in 'n aantreklike pakket. Ons glo dat prestasie-data die beeste moet rugsteun en nie net opinies nie. Vir enige stamboom of prestasie-data om sin te te maak, moet dit met DNS bevestig word. Hierdie prestasie doelgerigtheid bly steeds ons primêre fokus.

Soos altyd, verkoop ons elke dragtige 6-jaar oud vroulike dier – geen uitsondering nie! Hierdie is 'n groep kragtige koeie wat geweldig funksioneel is – die gemiddelde reproduksie-indeks vir die koeie te koop vandag is 'n indrukwekkende 121. (Belangriker, die laagste reproduksie-indeks op die veiling is 'n uitstaande 118 indeks). Daar is 'n klompie baie spesiale spoel moontlikhede in die aanbieding.

Die seleksie van bulle gaan voort om bulle met uitstekende “Butt, Body & Balance” te voorsien. Alle bulle het op Suid-Afrika se grootste groeitoets en karkasskandering presteer. Die seleksieproses was weereens baie streng en slegs die top 33% van bulle gebore in 2014 word vandag verkoop.

Geniet die dag!

Philip & Vicky Barnard

Mequatling Angus Stud: Sale Checklist

- ☒ Bulls fertility tested by Dr Collin Albertyn
- ☒ Bulls 2016 sheath washed for trichomonas and vibrio by Dr Albertyn
- ☒ Bulls CA and TB tested 13 April 2016
- ☒ Bulls inoculated for rift valley fever, anthrax, black quarter evil, lumpy skin, Bovishield 4 and 1shot ultra 7 (all with booster shot)
- ☒ All bulls parentage confirmed with DNA testing, DNA on record at Unistel
- ☒ Bulls phase D growth tested
- ☒ Bulls carcass tested with Real Time Ultrasound scanning
- ☒ Bulls measured for frame score
- ☒ All pregnant 6 year old cows on sale
- ☒ Cows pregnancy tested by Dr Collin Albertyn
- ☒ Cows CA and TB tested 13 April 2016
- ☒ Cows inoculated for CA with RB51, rift valley fever, anthrax, black quarter evil, lumpy skin, Bovishield 4 and 1shot ultra 7 (all with booster shot).
- ☒ All cows' parentage confirmed with DNA testing. DNA on record at Unistel
- ☒ Cows and bulls performance tested
- ☒ Every cow reproduction index above 100
- ☒ No animals known carriers of genetic disorders such as marblebone disease or curly calf syndrome.
- ☒ Cattle inspected and approved by Angus Breed Director, John Boulle

Mequatling Angus Stoet: Veiling Oorsiglys

- ☒ Bulle vrugbaarheidsondersoek deur Dr Collin Albertyn
- ☒ Bulle geskedewas vir trichomoniasis en vibriose deur Dr Albertyn
- ☒ Bulle getoets vir BM en tering 13 April 2016
- ☒ Bulle ingeënt teen slenkalkoors, miltsiekte, sponssiekte, knoppiesvel, Bovishield en 1shot ultra 7 (almal met skraagdosis)
- ☒ Alle bulle se ouerskap bevestig met DNS, op rekord by Unistel
- ☒ Bulle op fase-D groeitoets getoets
- ☒ Bulle geskandeer vir lewendige ultrasoniese meetings
- ☒ Bulle gemeet vir raamgrootte
- ☒ Elke dragtige 6-jaar oud koei op die veiling
- ☒ Dragtigheid bevestig deur Dr Collin Albertyn
- ☒ Koeie vir BM en tering getoets 13 April 2016
- ☒ Koeie ingeënt vir BM met RB51, slenkalkoors, miltsiekte, sponssiekte, knoppiesvel, Bovishield en 1shot ultra 7 (almal met skraagdosis).
- ☒ Koei-kudde se ouerskap bevestig met DNS, op rekord by Unistel
- ☒ Koeie en bulle prestasie getoets
- ☒ Elke koei se reproduksie-indeks bo 100
- ☒ Geen beeste bewuste draers van bekende genetiese afwykings soos 'marblebone disease' of 'curly calf ' sindroom
- ☒ Diere geïnspekteer en goedgekeur vir registrasie deur Angus rasdirekteur, John Boule

Mequatling always starts their annual sale with one of the best - today's sale is started with a crackerjack 6 year old female!

Mequatling Red Fancypants is a lovely smaller framed feminine cow with an absolutely beautiful udder to nurse her calves with. She can be seen on page 3 of the colour pamphlet. Fancypants has produced 4 heifer calves for Mequatling with her last calf weaning at a superb 121 index. Like all females on offer today, she has calved as a 2 year old and every year thereafter.

A very strong set of balanced breeding values back this top performer.

Mequatling Red Courtly is a strong powerhouse female with length of body, volume and width across her hind quarter. She has a first class udder when in production.

Red Courtly successfully has done her job here at Mequatling: She calved before she was a full 2 years old and every year thereafter and has produced 2 heifers and 2 bull calves. This young female is backed by a beautiful dam and a proven sire that has produced over 500 progeny in South Africa. This cow also is backed by very strong and balanced breeding values.

This beaut of a medium framed cow is feminine with a top notch udder. She is thick, thick, thick. Red Lollypop is indeed one of today's picks and traces back to Mequatling Kroonprins, the flush brother to Mequatling Royal Flush that Mequatling chose to keep as resident Mequatling herdsire.

This young cow is a herdsire producing female of note: She is the dam of the 2013 Mequatling Cactus and the 2014 Mequatling High Voltage that sells as the featured lot 45 today.

Mequatling Red Ruby 10 0230 is the most valuable breeding Red Angus female to ever sell at Mequatling - this is not an opinion, this is a fact: She is the dam of the sensational Mequatling Fireworks that sold in 2014 at Mequatling for a new SA Auction Record of R200,000 plus Mequatling Fireworks II that sold for R95,000 in 2015. Mequatling Red Ruby 10 0230 is the flush sister to Red Ruby 238 that established a new SA Auction Record of R160,000 in 2015.

Red Ruby 10 0230 produced 30 embryos when she was flushed in October 2014 with a 87% pregnancy rate. We are blessed with her progeny that remain behind at Mequatling and now share her with the industry. Mequatling sells all 6 year olds with no exceptions, not even the very best!

REPRODUCTION INDEX
121

Mequatling Sunsation is a powerhouse donor female that has shown herself to be one of the very best Red Angus females in South Africa. Cows of this magnitude are hardly ever made available to purchase.

Sunsation has excelled all the way at Mequatling. She did this from the start and her 1st calf, Mequatling Rooty Toot Toot, was exported to Namibia for R150,000. She has weaned her 4 calves at an amazing 122 average index amidst very stiff competition. Sunsation has breeding values that are tremendously balanced and year value right in the top 1% of the breed.

We flush the best and Sunsation has been flushed 3 times with a 76% pregnancy rate. This cow is dynamite.

Mequatling Red Mama 10 0015 was a twin at birth and has produced twins herself. She weaned her 1st calf at a tremendous 116 index, had twins and then weaned her last 2 calves at respectable 104 and 99 indexes.

BLACK (Red gene carrier)

The Black Angus cows carrying the red-gene can be used both by Red Angus breeders and by Black Angus breeders:

If they are mated to a black bull (that doesn't carry the red gene) then 100% of the progeny will be black.

If these cattle are mated to a Red Angus bull, then the progeny will be Red on half the occasions and Black the other half, on average. As the Red gene is a non-diluter gene, there is no occurrence of off-colours i.e., the progeny are either totally black or totally red. You decide.

These Red gene carrier cattle offer an exciting opportunity to bring new and exciting genetics into the other colour code.

Mequatling always starts the bull offering with a top bull - quite frequently, this turns out to be the bargain of the day with many buyers left in the starting blocks.

Mequatling Ringside is a very balanced medium-framed bull with good length of body and superior muscling all the way through. He presents himself as an 'easy-doing' individual with a strong constitution.

Ringside has performed right from the start: he weaned with the best index of all the red bulls on offer today with a 126 index and carried on growing with a superlative 118 Average Daily Gain on South Africa's largest Angus growth test of 116 contemporaries. His wean and year breeding values are in the top 1% of South African bulls.

Mequatling Ringside visual muscling is proven by his real time ultrasound scanning (RTU) carcass evaluation where his eye muscle area was measured to be one of the top bulls on offer today. This bull has been measured and not found wanting!

Mequatling Smokin'Hot is a very special bull and is the son of the reigning South African Red Angus Cow sold at last year's sale to Ruben Redelinghuys. I personally always have liked this bull a lot and he can be seen featured proudly along with his dam on page 7 of the colour pamphlet.

Smokin'Hot was weaned by his wonderful dam with a tremendous 122 wean index. This herd sire prospect is deep dark red and has tremendous length of body. Smokin'Hot is a medium-framed powerhouse that is the heaviest red bull on sale today.

As befits a top herdsire, Smokin'Hot's growth breeding values are massive with his wean and year values easily in the top 1% of Angus bulls in South Africa. Smokin'Hot is a herd sire that surely will be remembered for a very long time.

Fully charged is a rugged contender that has extra length of body. His strong muscling is prominently visible on his forearm.

Mequatling Fully Charged is a Badlands Capacity son out of an outstanding young cow that weaned him with a major 117 index. Fully Charged was one of the top bulls on the carcass evaluation where he scanned a 118 marbling index plus a highly profitable 63.9% dressing percentage. This bull has outstanding growth breeding values with his wean and year values right in the top 1% of all Angus bulls in South Africa. If you are serious about making extra profit from your beef operation, then Fully Charged perhaps is a bull to consider very seriously.

6.7	2.34

FRAME SCORE 1 to 11
6.0

Mequatling Raw Power was described as such by John Boule upon examining the 2016 Mequatling bull offering. Raw Power is big, long and wide.

Mequatling Raw Power has desireable outcross breeding with a pedigree containing Mequatling Bazooka, Mequatling Kroonprins (our herd sire flush brother to Mequatling Royal Flush) and the Mequatling Matriarch 96 340 black donor line. This makes him one of the very strongest herd-building maternal bulls around and as such, he offers a very impressive 11.4 milk maternal breeding value.

Raw Power did the best of all the red bulls with the 2015 carcass evaluation - he scanned the top dressing percentage of 67.0% plus the 2nd best eye muscling and marbling measurements of all the red bulls measured.

This bull will imbue any herd with valuable maternal and carcass genetics that your children will thank you for, again and again.

5.0

Mequatling Rocketman is an embryo full brother to the previous lot 58. As such, he has desireable outcross breeding with a pedigree containing Mequatling Bazooka, Mequatling Kroonprins (our herd sire flush brother to the record setting Mequatling Royal Flush) and the Mequatling Matriarch 96 340 black donor line. This also makes him one of the very strongest herd-building maternal bulls around - he endorses this with an excellent 11.4 milk maternal breeding value.

Rocketman did really well on growth test to earn a 106 average daily gain index. This bull had the largest scanned eye muscle of all the red bulls measured with last year's carcass evaluation of 116 bulls - the RTU carcass evaluation is measured proof of the visual impression of superior muscling evident across this bull's back as he walks in the paddock!

Mequatling Call of Duty is a herd sire of note. We have tapped 400 straws of semen of this wonderful genetic package for our own use and this semen is not for sale to other breeders. Without Call of Duty's semen safely in our tank, Mequatling would not consider making this bull available today - I think Call of Duty is one of the best herd sires that we have bred in a very long time.

Call of Duty is the complete package and he is featured along with his wonderful dam and granddam on the back page of the colour pamphlet. We already have flushed his dam 3 years in a row, she is that good. His grand dam is the all time SA Auction Record priced Angus Female.

Mequatling Call of Duty has been Igenity 150K genomically evaluated with his docility being almost 2 standard deviations above the USA norm. Call of Duty has absolutely outstanding curve-bending breeding values at the top of the Angus breed in South Africa. His ADG breeding value is no. 1 in the breed - Call of Duty is ranked the *very best* of all bulls in South Africa!

Mequatling Born2Rule is a major contender today. This medium framed powerhouse has maximum capacity and is featured on page 9 of the colour pamphlet. We think so highly of this bull that we have tapped 230 straws of semen for our own use.

Born2Rule grew at a tremendous 120 index average daily gain and is the heaviest bull on sale today. His Igenity 150K genomic evaluation places his ADG almost a full standard deviation higher than the USA norm. Born2Rule scanned the largest eye muscle area of all 116 bulls Mequatling evaluated. His genomic tenderness evaluation ranks him at more than one standard deviation above the USA norm.

Mequatling Born2Rule has curve-bending breeding values at the very top of the South African Angus breed. His milk maternal and ADG values are in the top 1% of all bulls in the country. This bull has it all.

Mequatling Dixie is an unbelievably thick bull with tremendous depth of body. Dixie was PJ Budler's pick when he visited from Texas and went through the bulls in May this year. We really like this herd sire ourselves and tapped 230 straws to use in the Mequatling herd but not for sale to other breeders. Dixie is featured on page 10 of today's colour pamphlet.

As you'd expect, Dixie was a standout on growth test: after weaning at a whopping 124 index from his 1st calver Bismarck dam, he continued to excell with a 127 average daily gain index plus 114 feed efficiency index. His 150K Igenity genomic testing indicates his beef tenderness to be a full 2 standard deviations better than the USA norm.

This herd sire is backed by absolutely outstanding breeding values with his wean, milk and year all being in the top 1% of all Angus bulls in South Africa.

Dixie is one beaut of a bull.

Mequatling Mr Universe is one 'pumped up' individual with enough muscle to enter a Mr Universe competition. Mr Universe is a flush brother to lot 67 and 68 that appear earlier in today's catalogue plus 71 immediately afterwards. This must be one of the most prepotent set of embryo calves from any flush that Mequatling has ever produced with 4 flush brothers being featured in today's colour pamphlet. Mequatling Mr Universe is featured on page 11.

Mr Universe is a moderate framed 5.2 frame bull and completed the growth test with a solid 107 ADG index. His eye muscle was scanned to be one of the very best and emphatically proves his visual impression of major muscling.

Mequatling Mr Universe has excellent curve-bending breeding values with his milk maternal and ADG both being in the top 1% of all Angus bulls in the country.

Mequatling Jack Black is without a doubt one of the top bulls on sale today. This bull has presence and class. He is a bull with tremendous length and depth of body. Jack Black is a flush brother to lots 67, 68 and 70 also featured in the colour pamphlet. Jack Black appears on page 9 of today's pamphlet. The quality of these outstanding flush brothers makes the choice of a herd sire really difficult today.

Jack Black's superior visible muscling is confirmed as fact with his eye muscle area scanning the joint 2nd largest of all the black bulls measured.

Outstanding curve-bending breeding values endorse this bull with his milk and ADG both in the top 1% of all bulls in the country.

Mequatling Topside is a flush brother to Mequatling Complete featured on page 11 of the colour pamphlet. This medium framed bull is wide across the back with a strong topline.

Topside completed the growth test of 116 contenders with a 106 ADG index plus a 102 feed efficiency index. His ADG breeding value places him in the top 1% of all Angus bulls in South Africa. His profit potential also was endorsed with his 63.4% dressing percentage during the RTU carcass evaluation.

A strong package of maternal and growth breeding values back this bull all the way.

FRAME SCORE 1 to 11
6.6

Mequatling Hefty Henry is a Kodiak embryo son of the special Mequatling Lassie 1301 donor family. He is thick, long and deep with an extra well developed hind quarter. This bull is slightly taller than the other bulls available today and measures a 6.6 framescore.

Hefty Henry grew with a 105 average daily gain on growth test with his ADG breeding value placing him in the top 1% of all Angus bulls in the country. He scanned a 105 index for superior marbling plus a lucrative 62.3% dressing percentage.

Mequatling Hefty Henry has breeding values that appeal from the -0.11 for birth to the 30.6 for year. The 10.5 for milk maternal is just as appealing.

FRAME SCORE 1 to 11
6.2

Mequatling Tradesman is the last bull on sale today. This 6.2 frame bull is growthy with good length of body.

Tadesman earned a 105 ADG index and a 106 feed efficiency index against the strong field of 116 competitors. His ADG breeding value is in the top 1% of all bulls in SA. Likewise, the RTU scanning measurements of Tradesman showed strong and profitable performance with an excellent 63.5% dressing percentage.

As expected of any Mequatling bull included in our sale offering, Tradesman has very strong breeding values - he stretches from - 0.11 for birth to 30.6 for year breeding value. His 10.5 milk breeding value backs his potential maternal prepotency.

EXPORT TO SOUTHERN AFRICA:

Mequatling gladly will help buyers from Namibia, Botswana and Zimbabwe with the veterinary requirements for export of sale cattle. The cattle are welcome to stay for up to a month free of charge whilst the necessary veterinary tests are completed. We will do all the necessary on farm work for free. The veterinary costs and testing costs naturally are for the expense of the buyer. To make this easier for buyers we give you the option of adding R2,500/head to each lot purchased to cover all veterinary testing costs.

UITVOER NA SUIDERLIKE AFRIKA:

Mequatling help graag kopers van Namibië, Botswana en Zimbabwe met die veeartseny vereistese vir die uitvoer van veilings beeste. Die beeste is welkom om gratis op die plaas te bly tot 'n maand, terwyl die nodige veeartseny toetse voltooi word. Ons sal al die nodige werk op die plaas werk, gratis doen. Die veeartseny kostes en toets kostes word vanselfsprekend deur die koper gedek. Om dit makliker vir die kopers te maak, gee ons die opsie om R2,500/ kop vir elke lot gekoop by te voeg, om al die veeartseny toets kostes te dek.
